Summer at Sitka is a magical time. Our campus feels full of potential. The trees have greened, the native flowers are in bloom, the sun is out. The studios are bustling with students engaged in learning new techniques and teachers sharing a lifetime of knowledge. There is a palpable feeling of excitement in the air for learning and for the natural beauty. There is also a feeling of connection to this place and to the people here.

Debra Carus is teaching a metalsmith workshop here now. We asked her to share about her experience at Sitka with you.

Debra Carus, Sitka Center Instructor
